This production sheet replaces placeholder black blocks with precise foil application guides, metallic security thread placement, and per-page time & hash anchors. Use this sheet to produce the holographic foil patch (cut-and-apply) and to register the metallic thread path before printing on archival paper.

HOLOGRAPHIC FOIL APPLICATION GUIDE (CUT-OUT PATCH AREA)

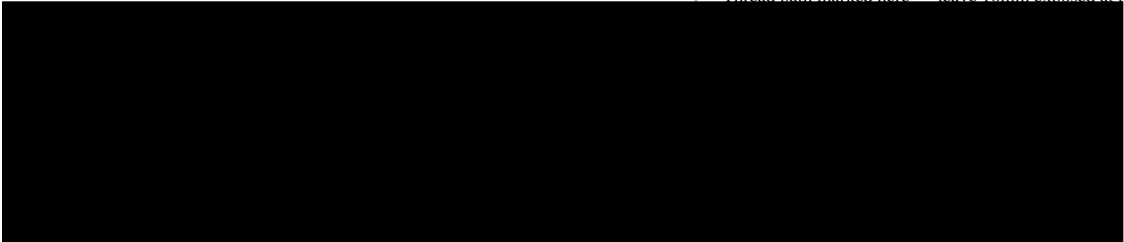

Dimensions: 170mm x 28mm (adjust printer scale to 100%)

Foil spec: Tamper-reactive holographic foil with microtext & micro-image

SECURITY WEAVE THREAD PATH (metallic thread to be embedded vertically):

MICRO-IMAGE: place micro-image at center of foil patch (visible on tilt)

Thread path marked here — leave 10mm exposed at top edge

Authentication Zone (apply after foil/thread embedding):
[Fingerprint (Slot #7) area] [Emboss Die area overlapping foil] [Wet Ink Stamp across foil & emboss] [Silver Signature line below]
